WORKS**

AGENDA

Introduction

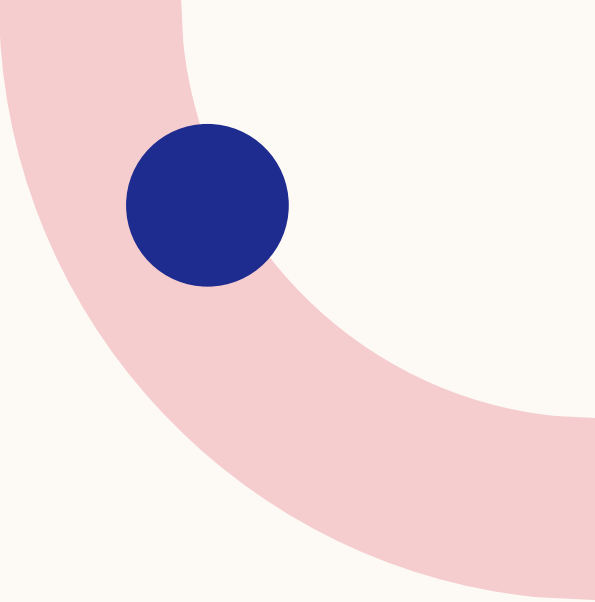

Group Rules & Culture

Icebreaker

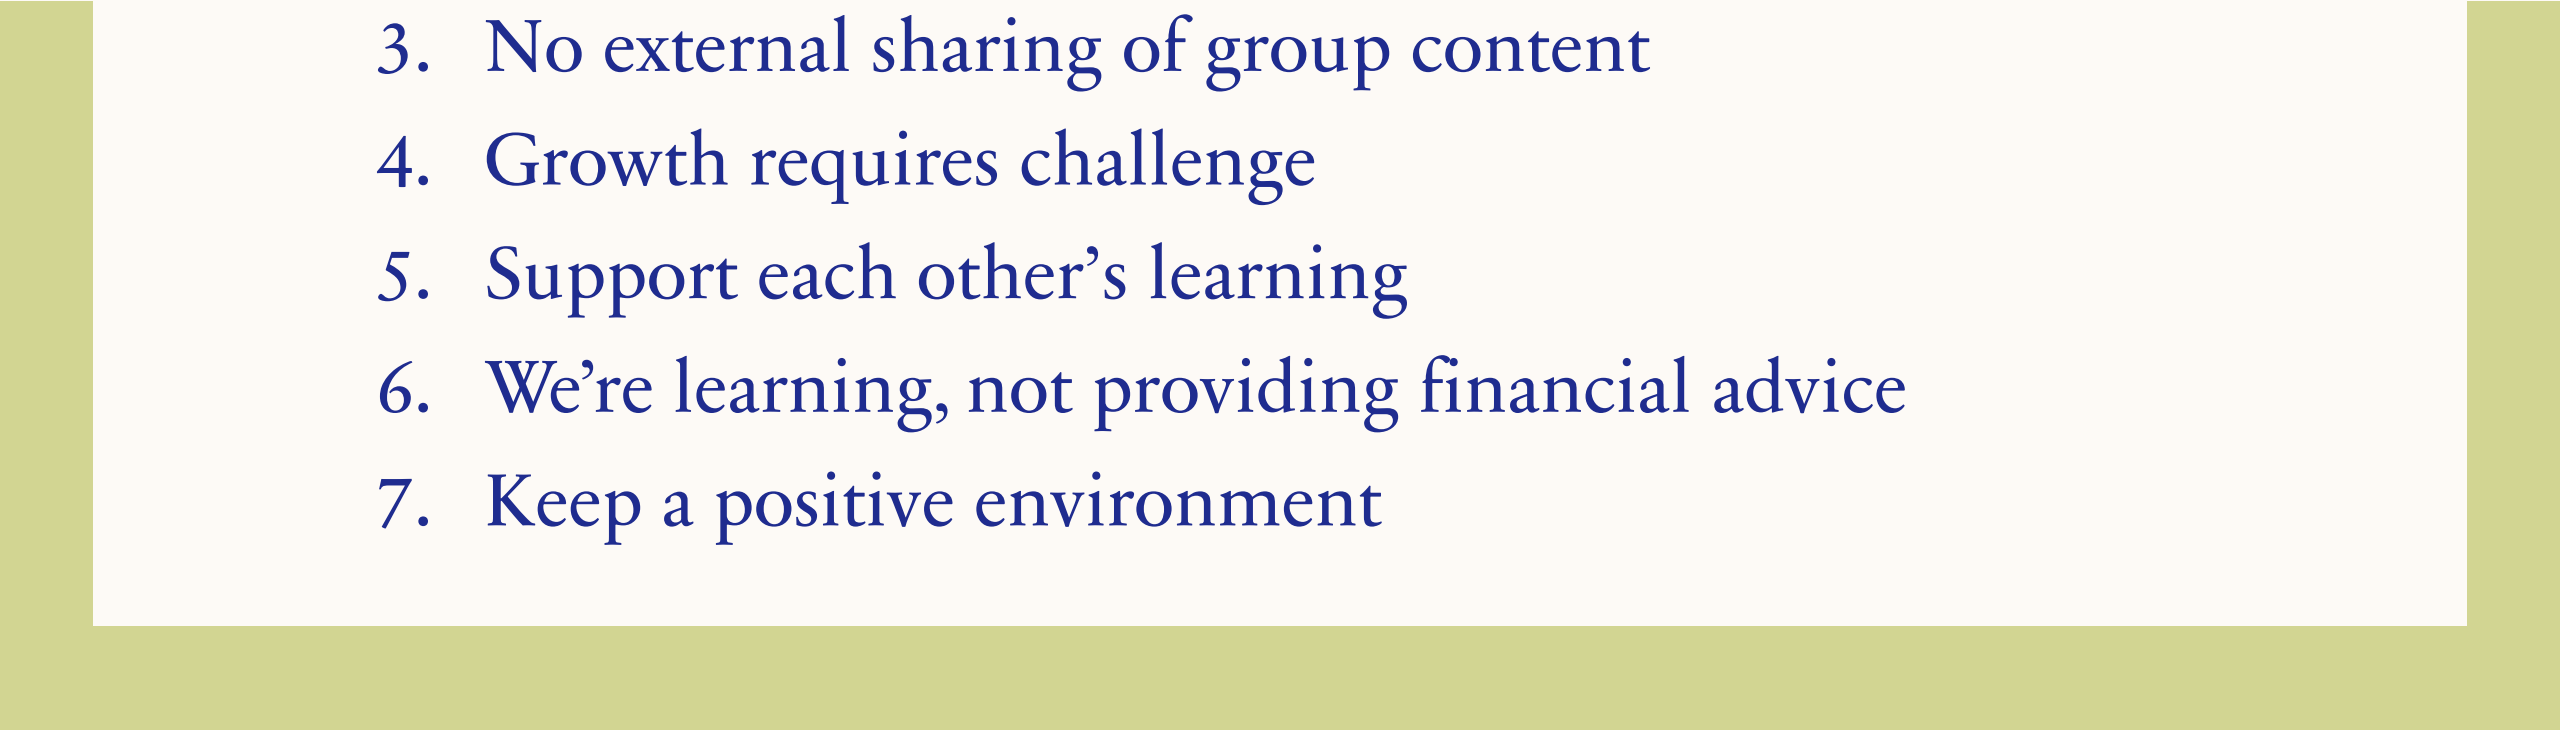

Proposed Learning Roadmap (phases 1 to 4)

WELCOME TO THE 5-MINUTE TRADER SLOWER PACED STUDY GROUP

- Growth-focused learning
- Supportive + challenging
- Clear roadmap ahead

GROUP RULES & CULTURE

1. Be Kind and Courteous
 2. Respect Everyone's Privacy
 3. No external sharing of group content
 4. Growth requires challenge
 5. Support each other's learning
 6. We're learning, not providing financial advice
 7. Keep a positive environment
- 

CENTRAL RESOURCE HUB

5

- All group resources and document will be stored in one central location here:
https://github.com/tradecblood/5_minute_trader_study_group

This is a GitHub repository, which serves as a web-based central location where files can be stored and accessed.

You can create your own GitHub account to store your own notes too — totally optional and not required..

- The complete **Community Learning Roadmap**, outlining our entire learning plan, is also stored in the same repository. It is a more detailed version of these slides.
https://github.com/tradecblood/5_minute_trader_study_group/blob/main/README.md

THE FOLLOWING SLIDES CONTAIN OUR COMMUNITY LEARNING ROADMAP

This contains an overview of our entire learning plan. For the full detailed plan see the last link in the previous slide.

PHASE 1: FOUNDATION REVIEW (NOW → 26 JULY)

7

Making the most of the 5-Minute Trader Challenge videos while they're still available

Over the next week, we'll all take time to rewatch the 5-Minute Trader Challenge videos. This is a great chance to refresh the core concepts and make sure we're all starting from the same baseline.

What we'll do during this phase:

- Rewatch the videos at your own pace
- Share insights, screenshots, and “aha moments” in the group
- Ask questions and help each other understand tricky parts

This keeps the group active and learning together while everyone gets comfortable with the material.

PHASE 2: WEEKLY WORKSHOPS (AFTER 26 JULY)⁸

We begin our guided learning journey together — step by step

- Each week focuses on one core topic from our roadmap
- We learn it together on a live call
- We practise the skills during the session
- Everyone gets hands-on support
- **We do not move on to the next week** until the whole group is comfortable with the material
- This ensures nobody gets left behind and everyone builds confidence at the same pace
- **Your commitment here matters**

PHASE 2:

WEEK 1: PLATFORM SETUP

9

Getting everyone fully set up and confident using their tools

Before we dive into charting and strategy, we'll make sure everyone is properly set up on their trading platforms. This ensures that when we start applying the strategy, everyone knows exactly how to execute trades safely and confidently.

- Charles Schwab account setup
- ThinkorSwim setup
- TradingView setup
- Risk management essentials

PHASE 2:

WEEK 2: CORE FUNDAMENTALS

Before diving into Heather's strategy, we'll make sure everyone understands:

- How to read a basic chart
- What the S&P 500 is and why it matters
- Candles, trends, swing highs/lows
- Moving averages and why EMAs are central to the strategy

This gives us a strong foundation for everything that comes next.

PHASE 2:

WEEK 3: PRICE LINES & TOP-DOWN ANALYSIS

11

We'll learn how to:

- Draw clean, meaningful price levels
- Identify important wicks
- Avoid clutter
- Perform top-down analysis (Daily → 4H → 1H → 5M)

Everyone will practice posting their charts, and we'll review them together.

PHASE 2:

WEEK 4: THE 5-MINUTE STRATEGY¹²

We'll break down the strategy step by step:

- Bias selection via 9/21 EMA cross (i.e. bullish or bearish)
- Building confluence (i.e. confidence in our bias) by combining:
 - **Bias** pointing one way
 - **EMA** alignment
 - **Chop** boxes
 - **Fake outs** (small body, long wick, next candle reverses) + liquidity grabs (market hunting stop losses)
 - **Breakout** candle (first strong candle in the bias direction)
 - **Fib** levels (help identify pullback after breakout candle)
- Entry + exit timing
- Avoiding traps

We'll practice marking entries on historical charts and share examples in the group.

PHASE 2:

WEEK 5: FIBONACCI RETRACEMENT & CONFLUENCE

We'll cover:

- How to draw fibs
- How fib levels add confluence
- How fibs interact with EMAs and structure

This is where the strategy becomes more precise and powerful.

PHASE 1 & 2 MEETING TIMES:

During both Phases 1 and 2 of our Learning Roadmap, we will meet at the following times typically:

Sunday 4pm EST / 9pm UK

Use the 'events' page in our Facebook group to find all scheduled meetings.

PHASE 3: WEEKLY OR TWICE-WEEKLY CALLS (ONGOING)

Consistent learning, community support, and shared progress

Once we're in the structured learning phase, we'll hold regular calls. These will include:

- A topic of the week
- Live chart walkthroughs
- Group practice
- Q&A
- Homework or chart exercises

We'll choose times that work for the majority (most members are EST), while still keeping things manageable for those in other time zones.

PHASE 4: TRADING CHALLENGES (ONGOING)

16

Putting the strategy into practice together

Once everyone is comfortable with the strategy and platform setup, we'll begin group trading challenges.

How it works:

- We pick a day to trade the 5-minute chart
- Everyone takes the same trade (paper or real)
- After market close, we review the trade together
- We share:
 - Our levels
 - Our bias
 - Our entry
 - Our results
 - What we learned

This builds confidence, sharpens skills, and helps us grow through shared experience.

WE PRIORITISE GROWTH OVER SPEED

As this community is about learning *together*, our focus is on growth over speed.

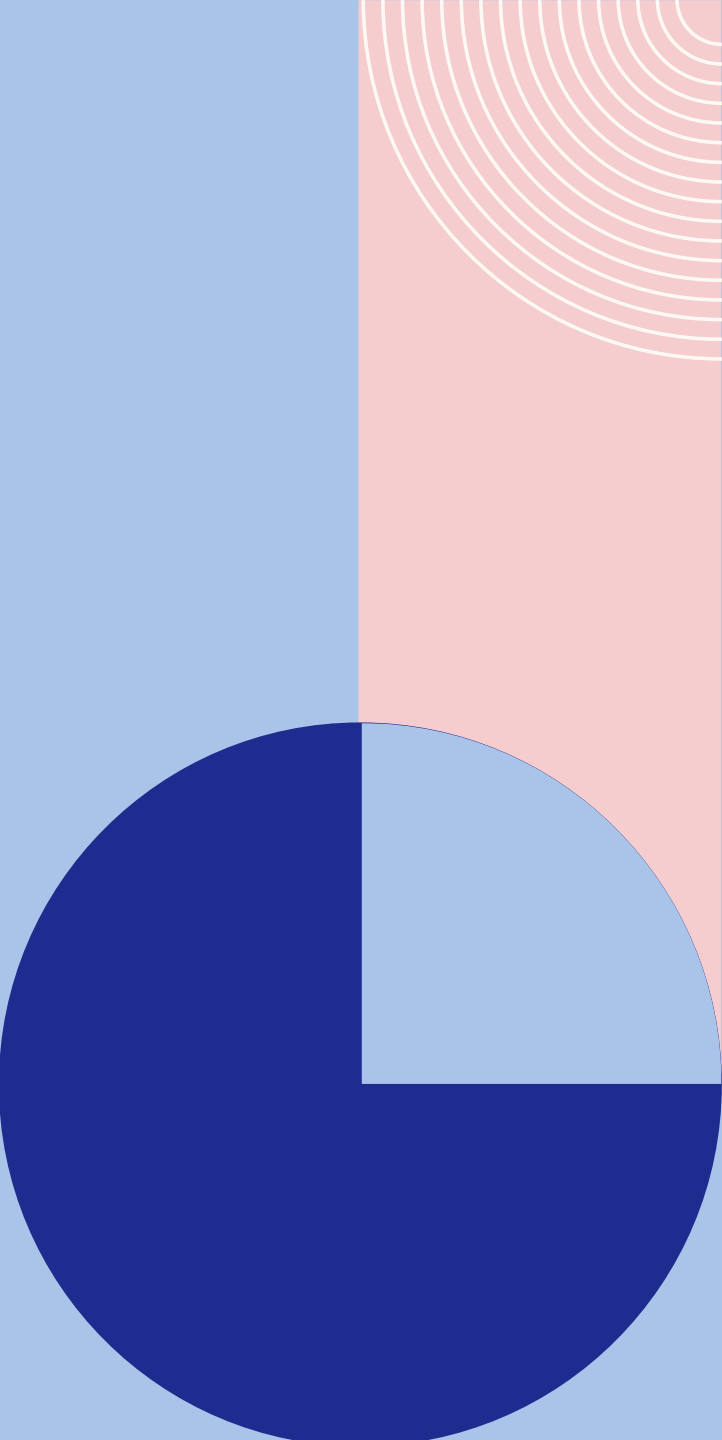

This means, if we need to spend several sessions to master one particular topic, we will prioritise this over moving forward without having a solid understanding.

THE SPIRIT OF THE GROUP

This community is about learning *together*.

We support each other, share insights, and grow as a team. The pace is steady, the environment is encouraging, and the goal is mastery through collaboration.

I'll guide the structure, host the calls, and help break down the strategy — but the real strength of this group comes from everyone contributing, asking questions, and helping each other succeed.
